W. BROOKE GRAVES

1899 - 1973

During his long career of service as professor and as research specialist at the Library of Congress, W. Brooke Graves also made notable contributions to the work of Pi Sigma Alpha. His books in the fields of public administration, state government, intergovernmental relations, and earlier in public opinion have been much used and cited. In 1960 he edited for Pi Sigma Alpha *Major Problems in State Constitutional Revision*, published by the Public Administration Service, Chicago, and still in wide demand. His death on September 3, 1973, leaves us indebted to him for his fellowship and work among us.

History of Pi Sigma Alpha

Pi Sigma Alpha was founded at the University of Texas as a national honor organization in October, 1920. Formation of the Society fulfilled a long-standing need of political science students and faculty members for an organization that would bring persons especially interested in the study of government into closer association with one another for their mutual benefit. Professor C. Perry Patterson was chosen to promote it, and became its first president for the first decade of its existence.

Pi Sigma Alpha was immediately successful on the University of Texas campus, and gradually other institutions applied for and were granted chapters. The University of Oklahoma and the University of Kansas received charters in March, 1922, and in the same month the Society held its first national convention on the University of Oklahoma campus. The Society experienced a steady expansion until 1939. Several local and regional political science honor groups were absorbed during this period of expansion. Growth was arrested during the Second World War. Since that time expansion has proceeded at an unprecedented pace. There are now 133 chapters distributed among the leading collegiate institutions in the country.

Today Pi Sigma Alpha is recognized in the educational world and in political science for the effective accomplishment of its objectives. The Society fills an important need in the advancement and diffusion of knowledge and interest in political science among students in collegiate institutions. Its position among the leading honor societies was established in 1949 through admission into membership in the Association of College Honor Societies. This association, originally organized by Phi Beta Kappa and Sigma Xi, is the co-ordinating agency of recognized collegiate honor societies. Pi Sigma Alpha is the representative of the political science field in the Association.

Total membership of the Society is approximately 35,000.
